

Car Care Awareness

Anthony Moffa

Air Quality Planner

North Central Texas Council of Governments

April 2021

North Central Texas
Council of Governments

Car Care Awareness

Advance air quality benefits for the region

Inform vehicle owners about maintenance

Educate about check engine lights

Build stronger community relations

Align nationally with the April and October Car Care Awareness month

Car Care Clinic History

NCTCOG initially began the clinics in April 2013

Clinics focused on the organization's message of education

Provided vehicle owners chance to speak with qualified technicians

Focus shifted to electronic outreach in 2020 due to pandemic

Car Care Clinic Website

North Texas Car Care Clinic website was launched in 2016

Online education material is available for download

Program status updates and vehicle maintenance tips

Email questions or comments to NTXCarCare@nctcog.org

Car Care Awareness Tips

A check engine light indicates a problem that is currently happening and requires immediate attention.

Driving with a check engine light may mean your vehicle is polluting more than it should, affecting air quality.

Good fuel economy, performance and low emissions are all effects of an efficiently operating engine.

Proper tire inflation can improve gas mileage by more than 3% or ten cents per gallon.

Save money and wear and tear on your tires!
