Appendix G

Individual Locations of Projects Listed in Appendix F

Due to space limitations, complete information about every project approved by the Regional Transportation Council (RTC) in Appendix F cannot be provided in that listing. Therefore, a list of projects that involve multiple locations (i.e., multiple traffic signals or intersection improvements) is provided in Appendix G. The master TIP project code is provided first for reference. Then, the individual locations associated with each master TIP project are provided and assigned an individual project code extension. For example, TIP Project 775 is listed as a master project with multiple locations, such as 775.0009, 775.0010, etc.
